

Trigve Hagen

Specializing in Custom Php, Drupal, Laravel, WordPress, Magento 2, and React Development with 10+ years Experience.

Washington, DC 20011 | +1 209 452 2699 | trigve.hagen@gmail.com

Professional Summary

I code mainly in php, python and JavaScript. I can also code in go, ruby, java, kotlin and c#. I Have worked professionally with React, Wordpress, Drupal 7, 8, 9 and 10, Magento 1 and 2, Laravel, Code Igniter and ASP.NET. I've been working with graphics and Adobe Photoshop for 10+ years. I'm comfortable with a hand full of different servers including Ubuntu and Express. I work as a full stack developer and often have tasks doing Dev-Ops.

Work Experience

Senior Drupal/PHP Developer

DECISION POINT CORP | Arlington, VA

January 2023 to April 2026

I worked in Drupal maintaining the code base. Everyday work includes updating, theming, patching, managing modules and creating custom modules. I work for The Office of the Inspector General on [stateoig.gov](https://www.stateoig.gov).

Website Theme Developer

Bravent LLC | Chantilly, VA

March 2021 to December 2022

Client - General Services Administration(GSA) ECAS Team

Was the main themer responsible for migrating a Drupal 7 site to Drupal 9 site for [acquisition.gov](https://www.acquisition.gov).

I have worked creating a new theme using uswds base theme in Drupal 9 site for [acquisition.gov](https://www.acquisition.gov) and helped implementing several new features for FAR browsing.

Also worked on [GSA.gov](https://www.gsa.gov) site theming and designing. Provided Wire Frames using Photoshop and Adobe XD when needed.

I have also done work on fixing security issues for [section508.gov](https://www.section508.gov). I am also working on content building and theming for websites like [cio.gov](https://www.cio.gov) and [ussm.gsa.gov](https://www.ussm.gsa.gov).

Senior Web Developer

Agri Design | Lodi, CA

May 2020 to May 2021

I work mainly building content on Wordpress sites including building and deploying plugins, adjusting sliders, and on one occasion installing a printer plugin that needed adjusting to create custom receipt content for a Star printer.

Senior Web Developer

One Day Doors and Closets | Rocklin, CA

September 2020 to January 2021

I work on developing back end including xml, database design and building, purchase order creating, email building, system component development and design, and front end design and UI using php based frameworks including jquery, code igniter and fat free.

I worked on the server as devops creating and managing the deployment.

Senior Drupal Developer

Godfrey Systems | Remote

January 2020 to March 2020

Maintained and upgraded Multilingual International Drupal 7.x sites with Johnson & Johnson Canvas theme based on Omega Drupal theme. Primary languages were php, javascript and some configurations in Ruby. The job included updating content and modules for Aveeno.com and creating pages and updating content using Expression Engine for Zarbees.com. Gained knowledge and experience working with ticketing system in an agile workspace, attended weekly meetings and completing projects that are part of sprint. Worked on secured development servers using multiple authentication system and Aquia desktop.

Senior Php Drupal Developer

Coffee Bean & Tea Leaf | Los Angeles, CA

March 2019 to October 2019

Created the add points section at coffeebeanrewards.com. The work included database migrations, adding rows, changing rows, adding pages, links and content. I worked on a staging site till it was ready then migrating code to production site. I also Maintained and updated the production site and database. I also did some work with HR to create admin area for customer service related request fulfillment. I Creating API endpoints for data management service and connecting data to HR department Drupal 7 website. I Worked on Drupal 7 admin for the district manager that was the back end for the fundraisers section of the coffeebean.com site in drupal 8 with twig. I also build the fundraiser application for the main site in drupal8 and twig. I also gained experience working with their Magento 2 EE front end for the coffeebean.com site. Frameworks included React, Drupal 7 and 8, Symfony, Stored Procedures, Microsoft SQL Server, Laravel, and Magento 2. I worked on the server as devops creating and managing the deployment.

Senior Web Developer

Workpuddle | Birmingham, AL

October 2018 to June 2019

I built out work puddle.net in Laravel for work puddle.com. The system is a resource for employers looking for candidates to fill positions in the medical industry. I used bootstrap 4, Ajax, Gulp and sass. Built out responsive email system, multiple entities including candidates and employers, an internal contact form for messaging between recruiters and employers while they bid on hourly and annual wages. A document up loader for resumes, w2 and other important documents. A document signer and a pdf maker. I worked on the server as devops creating and managing the deployment.

Senior Developer(PHP, Javascript)

The Lean Machine San Diego | San Diego, CA

November 2016 to October 2018

Built content and updated site when needed including plugin updates, wordpress version updates, updating woo commerce and changing old template files when updated template files became available. Created site content in php, mysql, javascript, html5 and css. Created a twilio plugin for their site. You can see the code and download it for personal use at

<https://github.com/Trigve-Hagen/Twilio-sms>.

Web Developer(PHP, Javascript)

socelite.com | Los Angeles, CA

January 2015 to January 2018

I worked as a Lead Developer on development of multiple websites in Magento 2, Wordpress, Drupal, Angular and Symfony. Built plugins, modules and theming using php, JavaScript, mysql, html5, and css. Provided wire frames using Photoshop and Adobe XD.

Web Developer(PHP, Javascript)

OnSors LLC. | Sun Valley, CA

January 2017 to April 2017

I built websites in Laravel, Symfony, CodeIgniter, and Magento 1. I built the site <http://arcsvcs.com> in Laravel using php, mysql, Html5 and css. Worked on Magento 1 building email templates and installing modules from amasty and other module providers while working at <https://numeusa.com>.

Web Developer(php, Javascript)

Denvolution.com | Beverly Hills, CA

October 2015 to June 2016

Dental Evolutions Inc.

E: cs@denvolution.com

I was hired on a by project basis to fix a broken product up loader in their Magento 1 installation at first. It then turned into doing other projects like creating pages and compressing the front page video so it would load faster adding content, fixing the https, uploading products and moving the pages around.

Web Developer(php, Javascript)

Lb4lbBoxing.com | Hollywood, CA

February 2014 to October 2014

Worked for Terry Claybon "Trainer for the stars" on his wordpress site. Really liked working on it as he trained a lot of celebrities and in particular Muhammad Ali. Built contented and adjusted layout. Wrote a plugin for the contact form login and register forms. It created the normal login and registration instead of the wordpress login form.

Web Developer(flash)

WebVixen | Los Angeles, CA

June 2008 to July 2011

Worked on Flash websites as I went through college.

Education

Computer Science (Associate)

Los Angeles Valley College | Los Angeles, CA

Publications

Missing Persons

<https://github.com/Trigve-Hagen/missing-persons-agent>

April 2026

I'm working on a console application built in python and flask that looks for missing persons. <https://globalwebmethods.com/node/1> is the download page where you can see my progress. It is not done yet but I'm proud of it. Its going to be awesome. I'm working on it in stages and building new downloadables as I progress. Thanks

Kaggle Competitions

<https://github.com/Trigve-Hagen/kaggle-competitions>

February 2026

Work on learning the nuts and bolts of AI models, agents and LLms

Module Cleanup

https://www.drupal.org/project/module_cleanup

June 2024

Lists uninstalled or deleted modules with leftover transient data and allows the admin to delete any leftover data. Lets the user run

```
field_purge_batch(1000)
```

to clean up problems with the Drupal installation.

React Ecommerce Store

<https://github.com/Trigve-Hagen/webegreat-dot-com>

November 2018

I built an eCommerce store in react that is free to download and customize. I still might do more work on it but it works as is you just have to style and configure it for you.

Twilio Plugin for WordPress

<https://github.com/Trigve-Hagen/Twilio-sms>

September 2017

Allow the client to send sms messages to customers and remind them to order.

Trigves Arm

<https://github.com/Trigve-Hagen/trigves-arm>

March 2017

Multidimensional Array to Relational Database mapping system. It takes out the need to run command line migrations further speeding up development time when creating database reliant programs in Php. The names of tables and rows are assigned long strings to create security and if using the array in the crud class instead of the names themselves the names can be easily changed in the array whenever you want.

Additional Information

Authorized to work in the US for any employer

I have a Clean Consumer Report. I can pass a drug screen and am willing to take one any time. I have no medical conditions which would hinder me from working. English is my primary language. Thanks again for your consideration.
